Eye Care and Wound Wash

Blue Dot™ is an established and highly respected brand and is the choice for both medical and industry professionals.

Blue Dot™ specialise in reliable products for clinical settings, including Hospitals and Emergency Healthcare, as well as businesses across the private sector.

This range of Eye Care & Wound Wash is tailored to treating minor injuries to relieve pain or discomfort. Additionally, the Blue Dot Eye Care & Wound Wash range includes dressings, kits and stations for patient care after more serious incidents. All products are easy to use and comfortable to apply.

Any kind of injury or trauma to the eyes should be taken seriously. Eye injuries caused by something getting into the eye can vary in severity. Some foreign objects can be rinsed out, but others may cut or penetrate the eye and require medical help quickly. Prompt medical attention for eye problems can save your vision and prevent further complication, therefore it is important that the correct First Aid consumables are to hand in case of an injury occurring.

The No. 1 industry-leading H-F Antidote Gel

for the fast and effective treatment of hydrofluoric acid burns

BLUEDOT[™]
TREAT • PROTECT • HEAL

What is H-F Antidote Gel?

H-F Antidote Gel from Bluedot is the UK's most trusted burn care product, providing instant treatment and relief from acid burns. Its gel formula and specialist active ingredients make it the ideal treatment in an emergency situation, protecting the burn site from prolonged chemical damage as it fights to stop calcium in bones being eroded by the acid.

Used by medical professionals and the healthcare industry, as well as recommended for use in medical kits for businesses and the home, H-F Antidote Gel is the industry's original and leading emergency treatment gel.

H-F Antidote Gel Product Range

H-F Antidote Gel by Bluedot is available in a safe and lightweight 25g tube for easy access and use. Packaged to the highest standards, it can be supplied individually or in boxes of 12. H-F Antidote Gel is also available as part of a fully-stocked, specialist first aid kit for environments that are at a high-risk of acid-related incidents.

Bluedot H-F Antidote Gel, No 1 Industry-leading Gel:

- ❖ Provides immediate relief by creating a barrier between the acid and wound.
- ❖ Prevents acid reaching vital organs, protecting from potentially lethal damage.
- ❖ Neutralises the effect of the acid through its specialist active ingredients
- ❖ Promotes wound healing as part of a comprehensive wound treatment programme.

Technical Data Sheet

Product:	Sterile topical saline solution.
Description:	A polythene ampoule (pod) containing 0.9% Sodium Chloride Ph. Eur. odourless, clear sterile aqueous solution.
Category:	Wound irrigation fluid.
Size:	20ml.
Class:	Class IIa Medical Device
Regulatory status:	Device has UKCA and CE marks.
Drug Tariff:	Available on NHS Drug Tariff
Indications:	For the topical irrigation and cleansing of wounds.
Contraindications:	Do not mix with other fluid except as directed.
Warnings/Precautions:	For external use only. Do not use for injections. Avoid direct contact between the spray nozzle and the surface of the wound. Keep out of reach of children. Do not use if the product is not clear. Do not use if the product has leaked before opening. For use on one occasion only – discard any leftover product. Not to be used with other irrigation fluids containing silver, lead or mercurials.
Directions for use:	Snap open the pod by twisting off the seal to reveal the nozzle. Hold firmly and squeeze to apply the solution directly to the area to be irrigated, or invert and squeeze gently to deliver the product dropwise.
Storage/Disposal:	The product should be stored at a temperature between 2 – 30°C, in a clean area well out of the reach of children. Empty pods can be disposed as general waste or recycled
